

Sales Analysis Project Requirements

1. Monthly Sales Analysis

Calculate monthly store sales and identify the month with the highest sales and the month with the lowest sales.

2. Product Category Sales Analysis

Analyze sales performance based on product categories and determine the highest and lowest performing categories.

3. Sub-Category Sales Analysis

Perform detailed sales analysis based on different product sub-categories.

4. Monthly Profit Analysis

Analyze monthly profit trends and identify the month with the highest profit.

5. Category and Sub-Category Profit Analysis

Evaluate profit contribution across categories and sub-categories.

6. Customer Segment Analysis

Analyze sales and profit performance based on customer segments.

7. Sales to Profit Ratio Analysis

Calculate and analyze the relationship between sales revenue and profit ratio to understand business profitability.

Project Objective:

The objective of this analysis is to understand sales performance, profitability trends, customer behavior, and product performance to support data-driven business decisions.
